Item 4.4 Update on Student Success Task Force Recommendation 3.1 to Establish System-Level Enrollment Priorities
Presented by: Linda Michalowski
This presentation focused on enrollment priorities for California community college students. California Education Code currently states that current and former foster youth and military and veteran students will receive priority registration. Title 5 encourages districts to provide priority enrollment to Extended Opportunity Program and Services (EOPS) and Disabled Students Programs and Services (DSPS) students but does not require it. Under the changes that are proposed in this item enrollment priority would be given to students in the following order:
• Statutory (current California Education Code) requirement: Current and former foster youth and military and veteran students.
• Regulatory (currently a suggestion) requirement: EOPS and DSPS students.
• Continuing and New students—will be added to the title 5 regulations.

However students with enrollment priority will have to meet the following criteria:
• All students who receive enrollment priority will have a 100 unit cap.
• All students have to be in good academic standing. Students could not be on academic or progress probation for two consecutive terms.
• New students will have an education plan and go through orientation or assessment. New students must have a goal of transfer, obtaining a degree or certificate, or career advancement.

If students fail to meet any of these criteria they will lose their enrollment priority and will register at open registration.

These regulations will also require districts to have an appeals process for students who lose enrollment priority and would allow districts to provide exemptions for students in certain groups.
