

# INSTITUTIONAL EFFECTIVENESS PARTNERSHIP INITIATIVE

## Participate | Collaborate | Innovate

IEPI is a Chancellor's Office initiative that advances institutional effectiveness and student success by promoting local aspirational goals, providing assistance through a collaborative "colleagues helping colleagues" approach, and sharing innovative practices across the system. As an outgrowth of the Student Success Task Force, IEPI helps you implement evidence-based strategies known to improve college/district operations and the success of your students.

## The Focus of IEPI:

### Indicators:

The Framework of Indicators provides the opportunity for colleagues across all aspects of the college/district community to engage in setting locally determined, short- and long-term aspirational goals in four areas: fiscal viability, student performance, accreditation status, and compliance with federal and state guidelines. Working together on the Indicators allows for a shared commitment to improving the health and effectiveness of your institution.

### Partnership Resource Teams:

PRTs are technical assistance teams whose members are drawn from a pool of volunteers within our system and carefully matched by their expertise to your institution's self-identified needs and interests. When your college, district or center is selected to receive a PRT, the team will make on-site visits to help your institution develop and implement its plan for improving institutional effectiveness.

### Professional Development:

In-person and online trainings help keep you on top of innovative and proven practices that promote sound college and district operations, and increase student success. IEPI asks colleges and districts to attend in teams to learn new strategies and create a plan to put them into practice. IEPI's Professional Learning Network, an online clearinghouse, provides effective practices at your fingertips 24/7 at [prolearningnetwork.cccco.edu](http://prolearningnetwork.cccco.edu).

**Participate.** Serve on the IEPI Advisory Committee, volunteer for a PRT, attend trainings, or access professional development opportunities through IEPI's online Professional Learning Network.

**Collaborate.** Work alongside your colleagues from across the campus and across the system to enhance our institutions' performance and foster our students' success.

**Innovate.** The future of the California Community Colleges system is being shaped right now as faculty, staff and administrators work together to find new solutions to perennial challenges. IEPI helps you to be a vital part of that future.
